Abstracts should only be from original research. Concepts, Future Studies and Reviews are not accepted.

Formatting guidelines:

Authors and Affiliations: The names and affiliations should appear below the title. Text/Body of the Abstract: A concise and factual abstract is required. An abstract is a single paragraph, without subheadings, indentation, or references. It should be an explicit summary of your presentation that states the research problem, the objectives, the methods used, and the major results and conclusions. Do not include bullets/lists or references in the abstract. Use only the SI units (eg. kg m⁻³ not as kg/m³). Chemical formulae should be written in a standard form such as “K₂SO₄”, not as “K2SO4”. Use a zero before decimal points such as “0.45,” not “.45.” The abstract should be between 250 and 300 words long and justified. (Font: Cambria, 12) The use of non-standard or uncommon abbreviations and references should be avoided. Keywords should be given leaving one-line space below this text. (Font: Cambria, 12, Left Aligned)

Keywords: Three to five keywords or phrases in alphabetical order, separated by commas.

Eg: Keywords: Social media, Blockchain, Sharding techniques, Consensus mechanisms, Blended learning

References, tables, or figures should not be included in the abstract.

Before submitting the abstract make sure the guideline texts are removed from the template.

For abstracts written in English: Use either United States (US) English or United Kingdom (UK) English. However, both US and UK English should not be written in a single article.

Non-English terms: All non-English terms should be *italicized* (e.g., *et al.*, *viz.*, *in vivo*, *in vitro*, *ad libitum*, *de novo*, *Hambanthota*, *Yala*)

All scientific names should be *italicized*. Both genus and species names should be mentioned at the first appearance and only the species name can be mentioned with the abbreviated genus name subsequently.
